has raised the question as to how the charges should be met this year as there is no provn made in the current year's Med budget. Two courses seem to be open at present:—

(1) To debit the charge to the provn in the Sanitary budget during the current year, provn being made in the Med budget from next year; or

(11) To direct the transfer to the Med budget at the end of the current official year of so much of the provn in the Sany budget as is necessary to cover the expenditure actually incurred during the year and order the amount to be debited to the Medical Deptt.

3) The Comptroller may, if apprd, be consulted U.O as to which of the two courses is more feasible and if neither, how the charges should be adjusted during the current year.
